CONTENTS OF VOLUME 97

NUMBER 1, 8 NOVEMBER 1984

QUINN, M. C. and HOWE, M. S., On the production and absorption of sound by lossless liners in the presence of mean flow	1
ZIÓŁKOWSKI, W. and ŚLIWIŃSKI, A., Influence of the inaccuracy in determination of the midpoint of a beam sample on the measurement of the complex elastic modulus when using the driving point impedance method	11
ŚNIADY, P., Vibration of a beam due to a random stream of moving forces with random velocity	23
WHISTON, G. S., Remote impact analysis by use of propagated acceleration signals, I: Theoretical methods	35
JORDAN, R. W. and WHISTON, G. S., Remote impact analysis by use of propagated acceleration signals, II: Comparison between theory and experiment	53
NAYFEH, A. H., Quenching of a primary resonance by a combination resonance of the additive or difference type	65
ARCZEWSKI, K., Topological analysis of a class of lumped vibrational systems by the method of structural numbers	75
PETTERNELLA, M. and VITELLI, R., Harmonic analysis of time-limited signals	87
SUZUKI, S.-I., In-plane vibrations of circular rings	101
HAUGHTON, D. M., Wave speeds in rotating thick-walled elastic tubes	107
SIMMONDS, E. J., A comparison between measured and theoretical equivalent beam angles for seven similar transducers	117
SINGH, V. V. and DEEPAK, D., Evaluation of track stiffness and track damping	129
SZYMczAK, C., Optimal design of thin-walled I beams for a given natural frequency of torsional vibrations	137
ROZMARYNOWSKI, B. and SZYMczAK, C., Non-linear free torsional vibrations of thin-walled beams with bisymmetric cross-section	145
SIMPSON, A., On the solution of $\mathbf{S}(\omega)\mathbf{x} = \mathbf{0}$ by a Newtonian procedure	153
<i>Letters to the Editor</i>	
WIGGINS-GRANDISON, M. D. and MICKENS, R. E., Exact solutions of non-linear unidirectional wave equations	165
FAHY, F. J., Rapid method for the measurement of sample acoustic impedance in a standing wave tube	168
IRIE, T., YAMADA, G. and MURAMOTO, Y., Natural frequencies of in-plane vibration of annular plates	171
LAURA, P. A. A., UTJES, J. C. and SÁNCHEZ SARMIENTO, G., Comments on "Flexural free vibrations of rectangular plates with complex support conditions"	176
LAURA, P. A. A., AVALOS, D. R. and CARNICER, R., Fundamental frequency of a circular membrane with a semicircular perturbation at the boundary	179

NUMBER 2, 22 NOVEMBER 1984

CVETIĆANIN, L., Vibrations of a textile machine rotor	181
LJUNGGREN, S., Torsional excitation of an infinite elastic plate with a soft, circular indenter	189
PAÏDOUSSIS, M. P., CHAN, S. P. and MISRA, A. K., Dynamics and stability of coaxial cylindrical shells containing flowing fluid	201
MACE, B. R., Wave reflection and transmission in beams	237
AKKAS, N. and JACKSON, J. E., JR, Structural instability in fluid-structure systems under hydrodynamic shock conditions	247
CUMMINGS, A., CHANG, I.-J. and ASTLEY, R. J., Sound transmission at low frequencies through the walls of distorted circular ducts	261
FIRTH, D. and FAHY, F. J., Acoustic characteristics of circular bends in pipes	287
SOLDATOS, K. P., A comparison of some shell theories used for the dynamic analysis of cross-ply laminated circular cylindrical panels	305
MACLENNAN, D. N. and DUNN, J. R., Estimation of sound velocities from resonance measurements on tungsten carbide calibration spheres	321
FUJII, S., TAKEDA, K. and NISHIWAKI, H., A note on tower wake/blade interaction noise of a wind turbine	333
MORENO, A., Factors influencing dB(A) ratings for sound insulation: incident noise spectrum and shape of the transmission loss curve	337

Letters to the Editor

TO, C. W. S., Discussion on "Vibration of a cantilever beam with a base excitation and tip mass"	349
KILLIAN, J. W. and LU, Y. P., A finite element modeling approximation for damping material used in constrained damped structures	352
NAESS, A., Correction note: "The effect of the Markov chain condition on the prediction of extreme values"	355

NUMBER 3, 8 DECEMBER 1984

SIMPSON, A. and SEMBI, P. S., On the use of exact modal analysis techniques in the design of damping devices for multi-conductor overhead power lines, Part I: The control of Aeolian vibration	357
DUMIR, P. C., NATH, Y. and GANDHI, M. L., Non-linear axisymmetric transient analysis of orthotropic thin annular plates with a rigid central mass	387
GUTTALU, R. S. and HSU, C. S., A global analysis of a non-linear system under parametric excitation	399
RAMAMURTI, V. and KIELB, R., Natural frequencies of twisted rotating plates	429
HADDOW, A. G., BARR, A. D. S. and MOOK, D. T., Theoretical and experimental study of modal interaction in a two-degree-of-freedom structure	451
NIETER, J. J. and SINGH, R., A computer simulation study of compressor tuning phenomena	475
MEIROVITCH, L. and SILVERBERG, L. M., Active vibration suppression of a cantilever wing	489

GIBERT, P., Contribution to the linear dynamic analysis of slender bodies in low and medium frequency ranges	499
LAU, J. H., Vibration frequencies for a non-uniform beam with end mass	513
<i>Letters to the Editor</i>	
RAO, G. V. and RAJU, K. K., On improving eigenvalue accuracies in finite element analysis	523
RAO, S. N. and GANESAN, N., Influence of unsymmetric boundary conditions on vibrations of tapered plates	526

NUMBER 4, 22 DECEMBER 1984

TRETHEWEY, M. W. and EVENSEN, H. A., Time-delay bias errors in estimating frequency response and coherence functions from windowed samples of continuous and transient signals	531
ABBAS, B. A. H., Vibrations of Timoshenko beams with elastically restrained ends	541
RICHARDS, E. J. and LENZI, A., On the prediction of impact noise, VII: The structural damping of machinery	549
SATO, H. and SHIMIZU, C., Transfer matrix analysis of non-linear free vibrations of circular plates with variable thickness	587
ALAM, N. and ASNANI, N. T., Vibration and damping analysis of multilayered rectangular plates with constrained viscoelastic layers	597
PRICE, S. J. and PAÏDOUSSIS, M. P., An improved mathematical model for the stability of cylinder rows subject to cross-flow	615

Letters to the Editor

BLEVINS, R. D., Discussion of "Guidelines for the instability flow velocity of tube arrays in crossflow"	641
CHEN, S. S., Author's reply	643
SZOPA, J., Sensitivity of stochastic systems to initial conditions	645
VERNIERE DE IRASSAR, P., FICCADENTI, G. and NAVA, L. C., A note on transverse vibrations of a non-homogeneous cardioidal membrane	650
UCHINO, E. and OHTA, M., General state estimation algorithm for quantized noisy systems by statistical equivalent linearization method, with special reference to room acoustics	653
DAS, T. and SIRCAR, R., Free flexural vibration of an isosceles right angled triangular plate resting on a non-linear elastic foundation, at large amplitude	658
ANNOUNCEMENTS	663
BOOK REVIEWS	671
HUMAN RESPONSE TO VIBRATION	675
INDEX TO VOLUME 97	679
